

OX BODIES PRODUCT IMPROVEMENT BULLETIN

Ox Bodies Hydraulic Hoses

Attn: Ox Bodies customers Date: 9/12/18

Effective 9/12/18 Ox Bodies is implementing the following change on all relevant products.

Ox Bodies is implementing an abrasion resistant hydraulic hose as a standard for the pressure line. The outer cover of this hose is 10 times more wear-resistant than a standard hose. The new abrasion resistant hose will provide durability as the hose is protected along its entire length. This solution is superior to secondary protection for a standard hose, which has gaps in coverage.
